**Description:** This year's longest stage -and one of the most famous and glorified of the distant past- is more than 30 km long. It's mostly flat, with very fast corners and straights that sometimes stretch to 400 meters. The surface has been worked from the beginning, and the narrow parts are only a few. Two of the best characteristics of this stage are the large number of spectator access roads, and the yumps near the finish.
